---

UI/UX Designer with over 2 years of professional experience contributing to internal web and mobile applications used in daily operations. Experienced in end-to-end UI/UX design processes from user research to user flows, wireframing, and high-fidelity prototyping. Accustomed to designing dashboard-based and data-driven systems, with a strong understanding of front-end basics that enables smooth collaboration with developers and effective design handoff.

CORE SKILLS

- Figma
- Whimsical
- Wireframing
- HTML & CSS
- Prototyping
- User Flow
- User Centered Design
- Teamwork

PROFESSIONAL EXPERIENCE

PT Sumber Energi Surya Nusantara (SESNA Group)

UI/UX DESIGN – Contract (Maret 2023 – Saat Ini)

- Designed end-to-end UI/UX for internal web and mobile applications used by multiple teams
- Analyzed user and business requirements to improve operational efficiency
- Created user flows, wireframes, prototypes, and high-fidelity UI designs
- Collaborated closely with software engineers during implementation to ensure design feasibility
- Supported development by slicing designs into HTML, CSS, and Bootstrap, ensuring alignment between design and front-end implementation

UI/UX DESIGN - Internship (Januari 2023 – Maret 2023)

- Independently created user flows, wireframes, and interactive prototypes based on user needs
- Responsible for UI/UX design of internal company applications
- Collaborated directly with developers and internal stakeholders to align design solutions

---

KEY PROJECTS

PT Sumber Energi Surya Nusantara (SESNA Group)

Internal Monitoring System PLTS

An internal web-based application used to monitor operational and technical data across multiple teams.

- Designed end-to-end UI/UX for dashboard-based monitoring views displaying real-time and historical data
- Structured complex data into clear, readable visual layouts to support daily operational decisions
- Created user flows, wireframes, and high-fidelity prototypes aligned with internal workflows
- Collaborated with developers to ensure designs were feasible and accurately implemented
- Actively used by multiple internal teams for daily monitoring activities

Client Monitoring System PLTS

A client-facing monitoring application that allows clients to track system performance and key metrics.

- Designed end-to-end UI/UX for dashboard-based monitoring views displaying real-time and historical data
- Designed UI/UX for client dashboards focused on clarity, readability, and ease of use
- Simplified complex technical data into user-friendly visual representations for non-technical users
- Created user flows and high-fidelity prototypes tailored to client needs and expectations
- Collaborated with developers to align design solutions with technical constraints and client requirements

Vendor Management System (VMS)

A web-based internal system for managing vendor data, services, and performance assessments.

- Designed UI/UX for vendor listing, vendor assessment, and summary dashboard features
- Improved information hierarchy to help users quickly understand vendor status and evaluation results
- Created high-fidelity UI designs and prototypes to support consistent implementation
- Worked closely with developers to ensure smooth design handoff and usability consistency

---

EDUCATION

Sekolah Tinggi Teknologi Duta Bangsa (2018 – 2022)
Bachelor of Informatics Engineering
GPA: 3.24

CERTIFICATIONS

- UI/UX Designer Virtual Internship Program – Niagahoster (2022)
- UI/UX Design Mastery (2021)
- Fundamental Front-End Web Development – Dicoding Indonesia (2020)
